The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS, THE HELICOPTER ASSOCIATION OF GREAT BRITAIN AND THE SOCIETY OF LICENSED AIRCRAFT ENGINEERS AND TECHNOLOGISTS

VOLUME XCVIII

JANUARY–DECEMBER 1994

SUBJECT INDEX

AERODYNAMICS

A demonstration of the effect of the testing environment on unsteady aerodynamics experiments, R. B. Green and R. A. McD. Galbraith, pp 83-90 (Mar.).

A dual time method for the solution of the unsteady Euler equations, A. L. Gaitonde, pp 283-291 (Oct.).

Aerodynamic characteristics of delta wing–body combinations at high angles of attack, P. R. Viswanath and S. R. Patil, pp 159-170 (May).

A hybrid integral equation finite volume scheme for transonic potential flow about complex configurations, A. K. Bhattacharya and N. L. Arora, pp 35-48 (Feb.).

Some observations on the dynamic response to wing motion of the vortex burst phenomenon, D. I. Greenwell and N. J. Wood, pp 49-59 (Feb.).

Technical Note — An investigation of dynamic stall through the application of leading edge roughness, R. B. Green and R. A. McD. Galbraith, pp 17-19 (Jan).

Technical Note — Experimental pressure evaluation near a sail leading edge under real conditions, G. Lombardi and A. Tonelli, pp 319-322 (Oct.).

Technical Note — The shedding frequency of segmented blunt trailing edges, M. S. Petrusma and S. L. Gai, pp 275-277 (Aug./Sept.).

The effect of geometry on the base pressure recovery of segmented blunt trailing edges, M. S. Petrusma and S. L. Gai, pp 267-274 (Aug./Sept.).

The interaction of a vortex with a boundary layer, C. P. Yeung and L. C. Squire, pp 311-318 (Oct.).

The Superorbital Expansion Tube concept, experiment and analysis, A. J. Neely and R. G. Morgan, pp 97-105 (Mar.).

Unsteady transonic computations for arbitrary wing planforms using the transonic small disturbance equation, N. Singh and S. Saha, pp 251-259, (Aug./Sept.).

Yaw control by tangential forebody blowing, N.J. Wood and W.J. Crowther, pp 147-154 (Apr.).

AEROFOILS

A cavitating aerofoil with a Prandtl-Batchelor eddy, E. Zachariou, P. Wilmott and A. D. Fitt, pp 171-176 (May).

Numerical solution of Euler equations for aerofoils in arbitrary unsteady motion, C. Q. Lin and K. Pahlke, pp 207-214 (Jun./Jul.).

Phenomena observed during aerofoil ramp-down motions from the fully separated state, R. B. Green and R. A. McD. Galbraith, pp 349-356 (Nov.).

Supercomputing in Fluid Flow, T. K. S. Murthy and C. A. Brebbia (Eds), p 155 (Apr.).
Tactical Missile Aerodynamics: Prediction Methodology. Progress in Astronautics and Aeronautics series Vol 142, M. R. Mendenhall (Ed), p 278 (Aug./Sept.).
Tribological Materials and NDE Flight Vehicle Materials, Structures and Dynamics series Vol. 4, R. L. Fusaro and J. D. Achenbach (Eds), p 20 (Jan.).
Turbulence Modelling for CFD, D. C. Wilcox, p 405 (Dec.).

BOUNDARY LAYERS

A comparison of several eddy viscosity turbulence models in two- and three-dimensional boundary layer flows, A. W. C. Leung and L. C. Squire, pp 73-82 (Mar.).
Transition of compressible high enthalpy boundary layer flow over a flat plate, Y.He and R. G. Morgan, pp 25-34 (Feb.).

CANARDS

Induced drag prediction for wing–tail and canard configurations through numerical optimisation, G. Lombardi and A. Vicini, pp 199-206 (Jun./Jul.).

CRYOGENICS

Liquid hydrogen shut-off geyser excitation induced by sloshing dynamics during draining in microgravity, R. J. Hung and K. L. Shyu, pp 237-250 (Aug./Sept.).

DRAG

Induced drag prediction for wing–tail and canard configurations through numerical optimisation, G. Lombardi and A. Vicini, pp 199-206 (Jun./Jul.).

FLUID DYNAMICS: FLOW

An experimental and computational investigation of ground effect lift loss for single jet impingement, D. N. Ing and X. Zhang, pp 127-136 (Apr.).
Axisymmetric afterbody experiments for CFD validation, P. Miller, J. Agrell, J. Olsson and K. Sjörs, pp 137-146 (Apr.).
Full Potential and Euler solutions for transonic unsteady flow, D. Ambrosi, L. Gasparini and L. Vigevano, pp 340-348 (Nov.).
Scaling of incipient separation in high speed laminar flows, G. R. Inger, pp 227-231 (Jun./Jul.).
Technical Note — Some aspects of the flow in S-shaped diffusing ducts, S. C. M. Yu and E. L. Goldsmith, pp 305-310 (Oct.).
Tuning the axial similarity method for accurate calculation of potential flow around axisymmetrical bodies, M. F. Zedan, pp 215-226 (Jun./Jul.).
Turbulence structure manipulation in a channel flow by outer layer devices, G. Iuso, pp 388-394 (Dec.).

ORNITHOPTERS

To fly like birds — human flapping flight, P. Q. Collins and J. M. R. Graham, pp 177-184 (May).

PHOTOGRAPHS

Aircraft

Aero Designs Pulsar XP kit of parts, p 379 (Dec.).
Avro RJ85 of Crossair, p 370 (Dec.).

CAD/CAM

Learjet 45 forward fuselage and cockpit, p 380 (Dec.).
MD-90 throttle box, p 381 (Dec.).

Historical

Sopwith production line at the Ham Works, Kingston in December 1918 — Salamanders, Dolphins and Snipes, p 368 (Dec.).

Marine craft

Detail of the genoa shape. "optimum" trim angle of attack, p 322 (Oct.).
Detail of the genoa shape. "optimum" trim angle of attack minus 10°, p 322 (Oct.).
The yacht Mefistofele sailing for the tests, p 319 (Oct.).

Rail transport

The German Transrapid train, p 373 (Dec.).

Rotorcraft

An early Cierva autogyro, p 113 (Apr.).
The flapping hinge (Parnell Autogyro), p 114 (Apr.).
The tilting rotorhead (Bensen B-8M), p 114 (Apr.).
Cyclic pitch control (Hafner ARIII), p 114 (Apr).
Jump start capability — drive system, p 114 (Apr.).
Sea King rotorhead, p 115 (Apr.).
Bearingless main rotor (BMR) on the BO 108, p 115 (Apr.).
ARIS — system installation, p 117, (Apr.).
Vibration health monitoring — Puma, p 119 (Apr.).
The conventional tail rotor, p 119 (Apr.).
The fenestron, p 119 (Apr.).
The Notar tailboom (MD900), p 119 (Apr.).
Example of a compound helicopter (Sikorsky S-72 Rotor System Research Aircraft), p 120 (Apr.).
Sikorsky XH-59A, ABC rotor, p 121 (Apr.).
Compound EH101, p 122 (Apr.).
The V-22 Osprey, p 124 (Apr.).
Westland (Fairey) Rotodyne, p 126 (Apr.).

Test results

Smoke flow visualisation pictures of the NACA 0015 section at 10° incidence, Re = 10 000, p 89 (Mar.).
Schlieren image of case C, p 143 (Apr.).
Surface flow pattern (wing sweep = 60°, α = 2°), p 162 (May).
Surface flow pattern (wing sweep = 60°, α = 16°), p 162 (May).
Surface flow pattern (wing sweep = 50°, α = 37°), p 163 (May).
Surface flow pattern (wing sweep = 60°, α = 38°), p 163 (May).
Surface flow pattern (wing sweep = 70°, α = 37°), p 163 (May).
Oil flow visualisation, p 271 (Aug./Sept.).
Three dimensional structure in the wake of a segmented blunt trailing edge, b/h = 3, p 272 (Aug./Sept.).

Windtunnel models

View of 10° model in tunnel, p 139 (Apr.).

ROTORCRAFT

A new approach in the analysis of linear systems with periodic coefficients for applications in rotorcraft dynamics, D. -H. Wu and S. C. Sinha, pp 9-16 (Jan.).
The 34th Cierva Lecture. Some reflections on trends in rotorcraft technology and configurations — into the 21st century, D. E. H. Balmford, pp 113-126 (Apr.).
Validation of a non-linear individual blade rotorcraft flight dynamics model using a perturbation method, S. S. Houston, pp 260-266 (Aug./Sept.).

ROYAL AERONAUTICAL SOCIETY LECTURES

The 5th Sopwith Lecture. The world of regional aircraft — challenges and opportunities, P. H. Summerfield, pp 367-387 (Dec.).
The 34th Cierva Lecture. Some reflections on trends in rotorcraft technology and configurations — into the 21st century, D. E. H. Balmford, pp 113-126 (Apr.).

ROYAL AERONAUTICAL SOCIETY SYMPOSIA
Project review — do you really know where you are?, L. R. Balthazor, pp 91-96 (Mar.).

SAFETY
Reliability, safety and civil aviation, N. R. S. Tait, pp 185-191 (May).

SIMULATION
Modelling requirements in flight simulation, A. G. Barnes, pp 395-404 (Dec.).

SPACE
Compact analytical solutions for a decaying, precessing circular orbit, C. R. McInnes, pp 357-360 (Nov.).

STABILITY AND CONTROL
Engineering Note — Demonstration of aircraft dynamic stability and response for aeronautical engineering students, A. W. Bloy, pp 192-193 (May).
The theory of the longitudinal static stability of the hang-glider, M. V. Cook, pp 292-304 (Oct.).

SUPERSONIC FLOW
Passive control of pre-entry shock in supersonic intakes, S. C. Rolston and S. Raghunathan, pp 1-8 (Jan.).
The development of a Riemann solver for the steady supersonic Euler equations, E. F. Toro and A. Chakraborty, pp 325-339 (Nov.).

WINDTUNNELS
A new approach to adaptive wall windtunnel testing, E. Fakas and L. Bernstein, pp 60-68 (Feb.).

AUTHOR INDEX

AGRELL, J., MILLER, P., OLSSON, J. and SJÖRS, K.
Axisymmetric afterbody experiments for CFD validation, pp 137-146 (Apr.).

AMBROSI, D., GASPARINI, L. and VIGEVANO, L.
Full Potential and Euler solutions for transonic unsteady flow, pp 340-348 (Nov.).

ARORA, N. L. and BHATTACHARYA, A. K.
A hybrid integral equation finite volume scheme for transonic potential flow about complex configurations, pp 35-48 (Feb.).

BALMFORD, D. E. H.
The 34th Cierva Lecture. Some reflections on trends in rotorcraft technology and configurations — into the 21st century, pp 113-126 (Apr.).

BALTHAZOR, L. R.
Project review — do you really know where you are?, pp 91-96 (Mar.).

BARNES, A. G.
Modelling requirements in flight simulation, pp 395-404 (Dec.).

BERNSTEIN, L. and FAKAS, E.
A new approach to adaptive wall windtunnel testing, pp 60-68 (Feb.).

BHATTACHARYA, A. K. and ARORA, N. L.
A hybrid integral equation finite volume scheme for transonic potential flow about complex configurations, pp 35-48 (Feb.).

BLOY, A. W.
Engineering Note — Demonstration of aircraft dynamic stability and response for aeronautical engineering students, pp 192-193 (May).

CHAKRABORTY, A. and TORO , E. F.
The development of a Riemann solver for the steady supersonic Euler equations, pp 325-339 (Nov.).

COLLINS, P. Q. and GRAHAM, J. M. R.
To fly like birds — human flapping flight, pp 177-184 (May).

COOK, M. V.
The theory of the longitudinal static stability of the hang-glider, pp 292-304 (Oct.).

CROWTHER, W. J. and WOOD, N. J.
Yaw control by tangential forebody blowing, pp 147-154 (Apr.).

FAKAS, E. and BERNSTEIN, L.
A new approach to adaptive wall windtunnel testing, pp 60-68 (Feb.).

FITT, A. D., WILMOTT, P. and ZACHARIOU, E.
A cavitating aerofoil with a Prandtl-Batchelor eddy, pp 171-176 (May).

GAI, S. L. and PETRUSMA, M. S.
Technical Note — The shedding frequency of segmented blunt trailing edges, pp 275-277 (Aug./Sept.).

The effect of geometry on the base pressure recovery of segmented blunt trailing edges, pp 267-274 (Aug./Sept.).

GAITONDE, A. L.
A dual time method for the solution of the unsteady Euler equations, pp 283-291 (Oct.).

GALBRAITH, R. A. MCD. and GREEN, R. B.
A demonstration of the effect of the testing environment on unsteady aerodynamics experiments, pp 83-90 (Mar.).

Phenomena observed during aerofoil ramp-down motions from the fully separated state, pp 349-356 (Nov.).

Technical Note — An investigation of dynamic stall through the application of leading edge roughness, pp 17-19 (Jan).

GASPARINI, L., AMBROSI, D. and VIGEVANO, L.
Full Potential and Euler solutions for transonic unsteady flow, pp 340-348 (Nov.).

GOLDSMITH, E. L. and YU, S. C. M.
Technical Note — Some aspects of the flow in S-shaped diffusing ducts, pp 305-310 (Oct.).

GRAHAM, J. M. R. and COLLINS, P. Q.
To fly like birds — human flapping flight, pp 177-184 (May).

GREEN, R. B. and GALBRAITH, R. A. MCD.
A demonstration of the effect of the testing environment on unsteady aerodynamics experiments, pp 83-90 (Mar.).

Phenomena observed during aerofoil ramp-down motions from the fully separated state, pp 349-356 (Nov.).

Technical Note — An investigation of dynamic stall through the application of leading edge roughness, pp 17-19 (Jan).

GREENWELL, D. I. and WOOD, N. J.
Some observations on the dynamic Response to wing motion of the vortex burst phenomenon, pp 49-59 (Feb.).

HE, Y. and MORGAN, R. G.
Transition of compressible high enthalpy boundary layer flow over a flat plate, pp 25-34 (Feb.).

HOUSTON, S. S.
Validation of a non-linear individual blade rotorcraft flight dynamics model using a perturbation method, pp 260-266 (Aug./Sept.).

HUNG, R. J. and SHYU, K. L.
Liquid hydrogen shut-off geyser excitation induced by sloshing dynamics during draining in microgravity, pp 237-250 (Aug./Sept.).

ING, D. N. and ZHANG, X.
An experimental and computational investigation of ground effect lift loss for single jet impingement, pp 127-136 (Apr.).

INGER, G. R.
Scaling of incipient separation in high speed laminar flows, pp 227-231 (Jun./Jul.).

IUSO, G.
Turbulence structure manipulation in a channel flow by outer layer devices, pp 388-394 (Dec.).

LEUNG, A. W. C. and SQUIRE, L. C.
A comparison of several eddy viscosity turbulence models in two- and three-dimensional boundary layer flows, pp 73-82 (Mar.).

LIN, C. Q. and PAHLKE, K.
Numerical solution of Euler equations for aerofoils in arbitrary unsteady motion, pp 207-214 (Jun./Jul.).

LOMBARDI, G. and TONELLI, A.
Technical Note — Experimental pressure evaluation near a sail leading edge under real conditions, pp 319-322 (Oct.).

LOMBARDI, G. and VICINI, A.
Induced drag prediction for wing–tail and canard configurations through numerical optimisation, pp 199-206 (Jun./Jul.).

MCINNES, C. R.
Compact analytical solutions for a decaying, precessing circular orbit, pp 357-360 (Nov.).

MILLER, P., AGRELL, J., OLSSON, J. and SJÖRS, K.
Axisymmetric afterbody experiments for CFD validation, pp 137-146 (Apr.).

MORGAN, R. G. and NEELY, A. J.
The Superorbital Expansion Tube concept, experiment and analysis, pp 97-105 (Mar.).

MORGAN, R. G. and HE, Y.
Transition of compressible high enthalpy boundary layer flow over a flat plate, pp 25-34 (Feb.).

NEELY, A. J. and MORGAN, R. G.
The Superorbital Expansion Tube concept, experiment and analysis, pp 97-105 (Mar.).

OLSSON, J., MILLER, P., AGRELL, J. and SJÖRS, K.
Axisymmetric afterbody experiments for CFD validation, pp 137-146 (Apr.).

PAHLKE, K. and LIN, C. Q.
Numerical solution of Euler equations for aerofoils in arbitrary unsteady motion, pp 207-214 (Jun./Jul.).

PATIL, S. R. and VISWANATH, P. R.
Aerodynamic characteristics of delta wing–body combinations at high angles of attack, pp 159-170 (May).

PETRUSMA, M. S. and GAI, S. L.
Technical Note — The shedding frequency of segmented blunt trailing edges, pp 275-277 (Aug./Sept.).

The effect of geometry on the base pressure recovery of segmented blunt trailing edges, pp 267-274 (Aug./Sept.).

RAGHUNATHAN, S. and ROLSTON, S. C.
Passive control of pre-entry shock in supersonic intakes, pp 1-8 (Jan.).

ROLSTON, S. C. and RAGHUNATHAN, S.
Passive control of pre-entry shock in supersonic intakes, pp 1-8 (Jan.).

SAHA, S. and SINGH, N.
Unsteady transonic computations for arbitrary wing planforms using the transonic small disturbance equation, pp 251-259, (Aug./Sept.).

SHYU, K. L. and HUNG, R. J.
Liquid hydrogen shut-off geyser excitation induced by sloshing dynamics during draining in microgravity, pp 237-250 (Aug./Sept.).

SINGH, N. and SAHA, S.
Unsteady transonic computations for arbitrary wing planforms using the transonic small disturbance equation, pp 251-259, (Aug./Sept.).

SINHA, S. C. and WU, D.-H.
A new approach in the analysis of linear systems with periodic coefficients for applications in rotorcraft dynamics, pp 9-16 (Jan.).

SJÖRS, K., MILLER, P., AGRELL, J. and, OLSSON, J.
Axisymmetric afterbody experiments for CFD validation, pp 137-146 (Apr.).

SQUIRE, L. C. and LEUNG, A. W. C.
A comparison of several eddy viscosity turbulence models in two- and three-dimensional boundary layer flows, pp 73-82 (Mar.).

SQUIRE, L. C. and YEUNG, C. P.
The interaction of a vortex with a boundary layer, pp 311-318 (Oct.).

SUMMERFIELD, P. H.
The 5th Sopwith Lecture. The world of regional aircraft — challenges and opportunities, pp 367-387 (Dec.).

TAIT, N. R. S.
Reliability, safety and civil aviation, pp 185-191 (May).

TONELLI, A. and LOMBARDI, G.
Technical Note — Experimental pressure evaluation near a sail leading edge under real conditions, pp 319-322 (Oct.).

TORO , E. F. and CHAKRABORTY, A.
The development of a Riemann solver for the steady supersonic Euler equations, pp 325-339 (Nov.).

VICINI, A. and LOMBARDI, G.
Induced drag prediction for wing–tail and canard configurations through numerical optimisation, pp 199-206 (Jun./Jul.).

VIGEVANO, L., AMBROSI, D. and GASPARINI, L.
Full Potential and Euler solutions for transonic unsteady flow, pp 340-348 (Nov.).

VISWANATH, P. R. and PATIL, S. R.
Aerodynamic characteristics of delta wing–body combinations at high angles of attack, pp 159-170 (May).

WILMOTT, P., ZACHARIOU, E. and FITT, A. D.
A cavitating aerofoil with a Prandtl-Batchelor eddy, pp 171-176 (May).

WOOD, N. J. and GREENWELL, D. I.
Some observations on the dynamic response to wing motion of the vortex burst phenomenon, pp 49-59 (Feb.).

WOOD, N. J. and CROWTHER, W. J.
Yaw control by tangential forebody blowing, pp 147-154 (Apr.).

WU, D.-H. and SINHA, S. C.
A new approach in the analysis of linear systems with periodic coefficients for applications in rotorcraft dynamics, pp 9-16 (Jan.).

YEUNG, C. P. and SQUIRE, L. C.
The interaction of a vortex with a boundary layer, pp 311-318 (Oct.).

YU, S. C. M. and GOLDSMITH, E. L.
Technical Note — Some aspects of the flow in S-shaped diffusing ducts, pp 305-310 (Oct.).

ZACHARIOU, E., WILMOTT, P. and FITT, A. D.
A cavitating aerofoil with a Prandtl-Batchelor eddy, pp 171-176 (May).

ZEDAN, M. F.
Tuning the axial similarity method for accurate calculation of potential flow around axisymmetrical bodies, pp 215-226 (Jun./Jul.).

ZHANG, X. and ING, D. N.
An experimental and computational investigation of ground effect lift loss for single jet impingement, pp 127-136 (Apr.).
